

TASK MANAGEMENT SYSTEM

Requirements Specification & User Stories

Gerald Masaba • Software Development Team Lead • Landsat ICT Solutions • v1.0 / June 2026

Purpose: Demonstrates Team Lead workflow — gathering requirements, translating them into functional/non-functional specs, mapping each to a user story with acceptance criteria and story points, then planning the sprint backlog before any code is written.

1 • Stakeholders

Stakeholder	Role	Interest	Involvement
Project Manager	Primary Client	Track projects & team tasks	Requirements approval, UAT sign-off
Team Members	End Users	View & update assigned tasks	Daily usage, UAT feedback
System Admin	Administrator	Manage users & settings	User mgmt, system config
Landsat Dev Team	Developers	Build & maintain system	Sprint delivery, code reviews

2 • System Requirements

2.1 Functional Requirements — what the system must do

ID	Requirement	Priority	Category	Story	Status
FR-001	Secure register / login	Must	Auth	US-001	Done
FR-002	Create task (title, desc, status, priority, due date)	Must	Task Mgmt	US-002	Done
FR-003	Paginated task list with key details	Must	Task Mgmt	US-003	Done
FR-004	Edit any accessible task	Must	Task Mgmt	US-004	Done
FR-005	Delete task with confirmation	Must	Task Mgmt	US-005	Done
FR-006	Assign task to a registered member	Must	Assignment	US-006	Done
FR-007/8	Filter tasks by status & priority	Should	Filtering	US-007	Done
FR-009	Validate inputs + clear error messages	Must	Validation	US-002	Done
FR-010	REST API endpoint returning JSON	Should	API	US-008	Done
FR-011/12	Colour-coded badges + flash messages	Should	UI/UX	US-003	Done
FR-013	Admin user management	Could	Admin	US-009	v1.1
FR-014	Email on task assignment	Could	Notif.	US-010	v1.1
FR-015	Dashboard with task statistics	Could	Analytics	US-011	v1.1

2.2 Non-Functional Requirements — how well it must work

ID	Category	Requirement	How Achieved
NFR-001	Security	All task pages require auth (else 403)	Laravel auth middleware
NFR-002	Security	Forms protected from CSRF	@csrf in all Blade forms
NFR-003	Performance	List loads <2s for 10k records	Eager load + pagination + indexes
NFR-004	Usability	Works on mobile & desktop	Bootstrap 5 responsive grid
NFR-005	Maintainability	MVC + Laravel conventions	Eloquent, Resource Controllers, Form Requests
NFR-006	Availability	99% production uptime	Monitoring, backups, health checks

3 • User Stories

Format: As a [role], I want to [action], so that [benefit]. Points use Fibonacci (1,2,3,5,8) — higher = more complex.

ID	Story	As a...	I want to...	So that...	Pri	Pts	Status
US-001	User Registration & Login	new user	register & log in securely	I can access the system with my own credentials	High	3	Done
US-002	Create New Task	project manager	create a task with title, desc, priority, status, due date	I can track work from the moment it is identified	High	5	Done

ID	Story	As a...	I want to...	So that...	Pri	Pts	Status
US-003	View Task List	team member	see a paginated list of tasks with status & priority	I get a clear overview of all work items	High	3	Done
US-004	Edit Task	project manager	edit any task's details incl. status	task information stays current	High	3	Done
US-005	Delete Task	project manager	delete a task no longer needed	the task list stays clean & relevant	High	2	Done
US-006	Assign Task	project manager	assign a task to a team member	every task has a clear owner	High	3	Done
US-007	Filter Tasks	team member	filter the list by status & priority	I quickly find relevant tasks	Medium	5	Done
US-008	Tasks via REST API	external developer	access task data via secure JSON API	I can integrate with other apps	Medium	8	Done
US-009	Admin User Management	administrator	create, edit, deactivate users	I control who has access	Medium	8	v1.1
US-010	Assignment Email	team member	get an email when a task is assigned	I'm immediately aware of new work	Low	5	v1.1
US-011	Statistics Dashboard	project manager	see task counts by status & priority	I get an instant view of workload	Low	8	v1.1

Sample acceptance criteria (US-002 Create Task): title required; status defaults to 'pending'; priority defaults to 'medium'; valid future due date; on success redirect to list with flash message; task appears immediately.

4 · Sprint Backlog & Story Points

Sprint 1 — Version 1.0 (2 weeks)

Story	Req ID	Task	Owner	Week	Pts	Status
US-001	FR-001	Laravel + Breeze auth + migrations	Senior	W1	3	Done
US-002	FR-002,009	Create form + validation + store	Mid	W1	5	Done
US-003	FR-003,011,012	List view + pagination + badges	Mid	W1	3	Done
US-004	FR-004	Edit form + update controller	Mid	W1	3	Done
US-005	FR-005	Delete with confirmation	Junior	W1	2	Done
US-006	FR-006	Assignment dropdown + FK	Senior	W2	3	Done
US-007	FR-007,008	Status + priority filtering	Mid	W2	5	Done
US-008	FR-010	API + Sanctum + Resource	Senior	W2	8	Done
—	—	Review + bug fixes + UAT + demo	Team	W2 D14	5	Done

Total Sprint 1: 37 points. Goal — deliver a fully functional Task Management System v1.0.

5 · Requirements Traceability Matrix

Maps every requirement → user story → implementation → test, so nothing is missed and the client sees full coverage.

Req ID	Story	Controller	View	Test Method	Status
FR-001	US-001	Auth (Breeze)	login/register.blade	test_user_can_login	Done
FR-002	US-002	store()	tasks/create.blade	test_can_create_task	Done
FR-003	US-003	index()	tasks/index.blade	test_task_list_loads	Done
FR-004	US-004	update()	tasks/edit.blade	test_can_update_task	Done
FR-005	US-005	destroy()	tasks/index.blade	test_can_delete_task	Done
FR-006	US-006	store()/update()	create+edit.blade	test_can_assign_task	Done
FR-007/8	US-007	index()	tasks/index.blade	test_filter_*	Done
FR-009	US-002	store()/update()	create+edit.blade	test_validation_rules	Done
FR-010	US-008	apiIndex()	N/A (JSON)	test_api_returns_tasks	Done
FR-013/14/15	US-009/10/11	User/Observer/Dashboard	admin & dashboard	planned tests	v1.1

6 · Definition of Done

No story is Done until all of the following hold:

Code Complete

- ✓ Works per acceptance criteria
- ✓ MVC + Laravel conventions
- ✓ Eloquent ORM (no raw SQL)
- ✓ Server-side validation
- ✓ No CSRF / SQLi / auth bypass; no N+1

Reviewed

- ✓ PR opened; Team Lead review approved
- ✓ All review comments addressed

Tested

- ✓ Feature test: happy path + edge cases
- ✓ All existing tests pass
- ✓ Manual test on Chrome & Firefox

Deployed & Documented

- ✓ Merged to develop branch
- ✓ Acceptance criteria verified
- ✓ API docs updated if applicable
- ✓ Marked Done in Jira/Asana

Requirements → User Stories → Sprint Planning → Traceability → Definition of Done. A Team Lead owns the whole process — not just the code.
